Dear Portfolio Show Visitor:

Thank you for taking the time to view my portfolio. Not only is filmmaking my passion, but I truly believe it's my purpose in life. I aim to achieve excellence through writing, directing and editing that releases a hunger of expression and authenticity.

Growing up, I always knew I wanted to write, but I didn't want to stop there. My longing for creativity reached greater heights through the pursuit of art, music and photography, which slowly accumulated into the love of story through filmmaking.

After graduating high school, I immediately pursued internships and hands-on experience with Chaos2Love Productions and PalomarTV. Throughout this process, I encountered the love of collaborating through task management, coordinating communication with multiple departments and bringing different perspectives. Not only did I gain exposure of the tactical organization in all realms of storytelling, but also in broadcast and documentary before going back to school.

When working in Film, I have found that every project is unique and brings potential to learn and grow. I am proud in my ability to adapt quickly in high stress environments as well as a dedication to maintain deadlines. Though much of my experience is in writing and post-production, I have also developed skills in producing, directing, cinematography, and research. I know that I will be able to help contribute to creating meaningful content that lives and breathes character and genuineness.

Please don't hesitate to reach out if you have any questions and I look forward to the opportunity to speak with you further. I greatly appreciate your consideration.

Sincerely,

Eloise van Zijl
