Dear Portfolio Show Visitor,

Thank you for visiting our online portfolio show! I am excited for you to see the work I have accomplished during my time at PSU. Film has been a passion of mine my entire life and I am determined to make it my career. Having spent years learning and practicing a range of production skills across multiple projects, I feel confident in my own abilities when operating audio/visual equipment and applying creative and innovative solutions to storytelling problems.

When producing my own short film this past Spring, I operated a Canon EOS C100, prepared multiple lighting setups, and directed a team to capture my vision. After filming wrapped, I edited the film in Adobe Premiere Pro, applying an appropriate flow and style in structuring the film. In pre-production, I planned and organized the film shoot and coordinated schedules with cast and crew to create efficiencies and complete the shoot in a timely manner.

I believe all of the work I have put in earning my bachelor's degree in film has prepared me for entry-level and freelance positions in the media production industry. Please let me know if you need a hard-working, dependable, and adaptable team member to contribute to a project. I am able to meet by phone or online at your convenience. Thank you for your time and consideration.

Sincerely,

Czerena Rodriguez
