Dear Portfolio Show visitor,

Since I was a kid, I have always loved sitting in front of a screen and immersing myself in whatever was on. I never wanted to be in the films though, I wanted to be the one that was making the films. I started making my own short films and helping collaborators with their projects. After high school, I took the leap and went to school at PSU to join their Film School. While there, I found the love for producing and camerawork.

I want to be the person behind the scenes making the film work, seeing the project from seed planted to the blooming tree that it will become. In classes I found out that I am fearless, willing take risks, and dedicated to working long hours to make sure whatever I am working on is complete and to high standards. I do everything I can to get a project finished and to make sure the team is happy with the outcome. With my knowledge of filmmaking and sales background, there is no one who I can't talk to and work with to make sure that they see where I am coming from, to make a deal, or to arrive at a mutually beneficial solution to problems.

While working a full time job and going to school, I also worked as a wedding videographer. I found this as a huge benefit in learning more about filmmaking, getting to know cameras intimately, shooting plenty of stable coverage for the editing process, and giving the clients a finished product in a very short amount of time.

I am a hard worker who if given the chance to work on your team, will demonstrate the same level of endurance, dedication, and fearlessness that you apply to your work. I look forward to hearing from you and seeing what I can offer to your next project.
