Dear Portfolio Show Visitor,

Thank you for taking the time to stop by! I'm proud to be sharing all that I've worked on in my four years at Portland State. I have grown in many ways that I didn't anticipate, including developing an interest in sound production and design. After realizing no one wanted to take the role of "sound guy" on student films, I saw an opportunity to contribute in a meaningful way and to feel good that I could deliver quality work that would be appreciated. I am looking for opportunities to do more in this field as I get started on my career path.

I have also explored branded media production, taking two courses where teams of students functioned as an agency and production company to create brand stories for mission-driven organizations. These experiences dovetailed well with my minor in advertising. I discovered, too, that I have leadership capabilities which I have practiced in the context of producing for short narrative films. I am frequently called to join fellow students' production teams to provide the kind of even-keeled, organized presence that is so helpful in fast-paced and high stress environments.

This showcase is just the first step into launching my professional career, but this isn't the end of my education. I am motivated to keep working on my craft, whether that's in sound recording, producing or even just as a production assistant; I still have a hunger to learn more. I hope that the lovely person reading this might give me that opportunity to begin the next stage of my journey or is just someone that will at least lend their support. In any case,

I hope you enjoy the showcase, and I greatly appreciate your time!

Sincerely,

Sapphire Maguigad
