Dear Hiring Professional,

As an avid film lover my entire life, it only made logical sense for me to pursue that passion into a career. In 2021, I decided to transfer to Portland State University, where I have learned many of the essential skills necessary to be an asset to any production. It is there that I have also bolstered many new connections and have begun building a network of like-minded individuals looking to change the landscape of cinema. I have worked on both short and feature productions and am willing to do whatever task is given to me.

I am great with collaboration and want to use my abilities to work with others in the filmmaking community. I have written multiple screenplays and have recently begun co-writing with other creators that have an idea for a film, yet need assistance with dialogue or narrative structure. I am driven to become a professional in the field of videography, as visual storytelling is a medium of expression unlike any other. I want to harness that creative outlet to bring new forms of media and entertainment to the world.

Outside of film, I have been working in the entertainment industry for close to a decade doing security work for various music venues around Portland. My love of music and rhythm led me to becoming a drummer when I was a child and that love has translated into my filmmaking. I am used to working in teams to ensure the general public can enjoy all forms of art with fun and safety.

With multiple writing and directing credits after a mere couple of years honing this craft, I am determined to make my childhood dream of being in the film industry a career reality. My creativity is only out-matched by my admiration of other people's visions and my desire to create alongside fellow cinephiles. I would be grateful to work with you so that I may continue to learn and grow as a professional filmmaker. I appreciate your time and I hope to hear from you soon.

Sincerely,  
Drew Hill
