Dear Portfolio Show Visitor,

Thank you for visiting our Portfolio Show. I am graduating from Portland State University's School of Film with a focus in editing and stop-motion animation and am ready to pursue opportunities in these areas or in any position in film and media production where my interpersonal, creative, and technical skills would be of use. I am eager to work with professionals who value creative collaboration.

I've taken on leadership roles on campus throughout my time at PSU, most notably as an Orientation Leader before my promotion to Orientation Professional Development Lead. These roles allowed me to connect with diverse groups of people, communicate essential information in a timely manner, as well as adapt in high-tension environments on-the-fly.

Through my production classes in Narrative Film, Documentary Film, Post-Production, and Stop-Motion and in my work as Social Media Manager, I have gained hands-on experience with storytelling tools such as Adobe Premiere Pro, Dragonframe, Canon video cameras, and Sound Devices audio recorders. My involvement in the PSU Fiber Arts Club and in the creation of multiple stop-motion armatures, has provided experience working with physical media, which I enjoy and which has given me confidence in my ability to create set pieces such as props, puppets, and clothing.

I am available to discuss how my capabilities align with the needs of your organization at your convenience. Thank you for your consideration and I look forward to speaking with you soon.

Sincerely,
Madison Hyatt
