Dear Portfolio Visitor,

Thank you for taking a moment to view my portfolio. Two things have always been a love of mine; films and puzzles, and editing films has been the greatest puzzle of them all. While my previous work experience has been in hotels, I made the decision to go back to college and get my degree in film during the pandemic. My skills learned from the hotel paired with my new knowledge of film makes me an excellent choice to work for Tello Films.

In school I have gained knowledge in Adobe Premiere Pro and become adept in linear and non-linear editing. I have worked on multiple student projects as the editor and created products the whole team can be proud of. I have worked closely with the directors to make sure their vision is able to truly shine through with my editing. I even have some knowledge with After Effects and have been using those skills to enhance our films with visual effects. I have a keen attention to detail and like to keep my workspace as organized as possible. My previous hotel experience taught me how to adapt to change quickly and how to prioritize multiple projects at once.

I didn't know how much I loved to edit until I went back to school. Getting to pick which clip fits best and put it in its perfect place always leaves me with a sense of great satisfaction. When I am finished, I love being able to sit back and watch this puzzle of film clips I created move seamlessly together to make something even more wonderful.

I hope you enjoy watching my work as much as I did creating it. Please reach out if you think I may be a good fit for any projects you may have. Thank you again for taking the time to view my portfolio.

Sincerely,

Sierra Star
