Dear Portfolio Show Visitor,

Thank you for stopping by my virtual booth! As I finish my college courses and graduate with a Bachelor of Science Degree in Film, I'm eager to apply my skills to the advertising industry here in Portland. I have experience performing many roles in production including writing, producing, directing, and sound recording. These have informed my understanding of storytelling; a skill I utilize best in post-production. I look forward to finding work as an editor or assistant editor after graduation.

My interest in film and video began as a YouTube viewer and content creator for a channel of my own. I took this high school hobby to the next level at Portland State University where I practiced a live action filmmaking skill set that spans the entire production process. My specialty area is editing, where I've developed a style that is cinematic in a technical sense but maintains the rhythm and pace of commercial content. I like to utilize clever cuts and sound design to maintain momentum throughout a piece.

I've become well-acquainted with the Adobe Creative Suite. I use Premiere Pro, After Effects, Photoshop, and Audition on a regular basis. Along with meticulous picture editing, I make sure every video is color corrected and sounds fantastic. I'm new to motion graphics, but I'm picking up how to create logos and short animated scenes very quickly. Taking multiple production courses at a time, I've learned how to manage multiple projects at once. I give the same amount of care and attention to organizing, labeling, and syncing media that I do with creative editing.

Thank you for taking the time to read my letter. I'm hoping that you'll consider me as your future assistant editor, or for any post-production work that needs to be done right.

Sincerely,
Karys Hobson
