Dear Portfolio Show Visitor,

I appreciate the time you took to look at my portfolio, I hope to hear your thoughts. What I hope my portfolio demonstrates is my ability and desire to experiment, both in the content and with the formal qualities of my projects. I believe that film as both a concept and an artistic medium should be explored and what it means should be challenged, that's what I hope to do for you.

After some time focusing on filmmaking as my primary artistic outlet and practice throughout highschool and college, I learned that the biggest appeal for me has been to use it as a tool to understand myself and the world. Aiming at such a goal has helped me better understand why I make films, which has allowed me to think about the process more methodically and grow my own understanding of what I want filmmaking to mean.

I don't only strive to understand through my own filmmaking, but to also understand films of the past. My interest in film extends past creating and into the areas of film archiving, curating, and preservation. I believe it's important to take care of and showcase the great works of the past, as that work is what has inspired my own and many others.

The passion, detail, and curiosity I bring to my own work I will bring to yours. My drive and commitment would make me a great addition to your team, I hope to talk soon.

Thank you,

Cadence Godula
